

Stow Recreation is excited to partner with Mad Science this summer to bring your child a week full of learning, play, and fun with our Water Works program!

Your child will become a junior scientist for the week, having the opportunity to experience real, live science! Water is more complicated than it looks - preschoolers will learn all about the different properties of water. They will learn about sea life, density, and buoyancy! Children will experiment with dry ice and water, create their very own water art and discover how water can be the most powerful force on earth. We will make our own wave motion modulators, bubble wands, and pet tornados to take home! Preschoolers will be amazed at how much they can do with WATER!
